

Did you know?

CRITICAL ILLNESS
CRITICAL ILLNESS II

1. Did you know our retirement reserve can be wiped out because of illness?

Cancer treatment can cost **HK\$1.4 to 3.7 million** in the U.S.
(estimated based on data from 2004 U.S. Clinical Journal, actual medical costs can vary based on the diagnosis, treatments and the hospital)

2. Did you know our family is highly vulnerable to CI risk?

1 in 4 men and 1 in 5 women had cancer

On average, about **one member** in each Hong Kong family gets critical illness
(based on data from 2004 Hospital Authority data and assume average family size of at least four members e.g. you, spouse, children and parents)

3. Did you know while we all live longer nowadays, the older we get, the higher the chance we get CI?

Male age 65 or above has **4-5 times higher chance to get CI** than the age group of 45-65

Female age 65 or above has **2-3 times higher chance to get CI** than the age group of 45-65

4. Did you know we have higher chance to get well from CI nowadays?

77% of Manulife CI claimants survive over 5 years

75% of prostate cancer patients survive over 5 years

80% of breast cancer patients survive over 5 years

96% of skin cancer patients survive over 5 years

5. Did you know recovery can be costly?

Strokes normally lead to **long term disability**

79% of child cancer patients require long term treatments after recovery

We **may not be physically fit for any work** right after recovery
