

Income Fund

- The Fund may invest primarily in fixed income instruments with varying maturities.
- Investments in fixed income securities are subject to interest rate, credit and downgrade risks. The Fund is also subject to risks of investing in high yield, below investment grade and unrated securities.
- It is subject to risks associated with emerging markets, mortgage-related and other asset-backed securities, sovereign debt, currency, liquidity and repurchase / reverse repurchase transactions.
- It may invest more than 10% in non-investment grade securities issued or guaranteed by a single sovereign issuer (e.g. Ukraine, Sri Lanka and Hungary) which may be subject to increased credit risk and risk of default.
- It may invest extensively in financial derivative instruments which may involve additional risks (e.g. market, counterparty, liquidity, volatility, and leverage risks).
- It may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share.
- Investments involve risks and your investment may suffer significant losses.
- Investors should not rely solely on this material and should read the offering document of the Fund for further details including the risk factors.

Fund Description

The Income Fund is a portfolio that is actively managed and utilizes a broad range of fixed income securities that seek to produce an attractive level of income with a secondary goal of capital appreciation.

This fund seeks to meet the needs of investors who are targeting a competitive and consistent level of income without compromising total return. The fund aims to achieve this by employing PIMCO's best income-generating ideas across global fixed income sectors with an explicit mandate on risk-factor diversification. The fund offers daily liquidity.

The fund taps into multiple areas of the global bond market, and employs PIMCO's vast analytical capabilities and sector expertise to help temper the risks of high income investing. This approach seeks to provide consistent income over the long term.

The Fund may use or invest in financial derivatives.

About the Benchmark

Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

Source: PIMCO, index provider for benchmark data. Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. [Ⓟ]PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of future performance of the Fund or the likely returns of any investment. ^ΔWhere permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. **Dividends are payable out of the capital of the Fund. As a result capital will be eroded and distributions will be achieved by foregoing the potential for future capital growth and this cycle may continue until all capital is depleted.** [Ⓜ]Duration is a measure of a portfolio's price sensitivity expressed in years. PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. ^{****}Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position. [†]Annualised distribution yield = (Dividend Rate * 12) / NAV on ex-dividend day. Annualised Distribution Yield is as of 30/06/2023. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2023 Morningstar Ltd. All Rights Reserved. Investment involves risk including possible loss of the principal amount invested. Investment involves risk. **Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.** Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. The Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), have different minimum investment requirements and are entitled to different services. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations.
