#Description of the Manulife Risk Meter

The risk level is represented by the Manulife Risk Meter, a 5-level risk continuum from 1 to 5, which signifies the risk profile of the investment choice. The more sensitive an investment choice is to the change of market conditions, the more volatile it is and therefore the higher its risk level is indicated by the Manulife Risk Meter. Likewise, an investment choice less sensitive to market condition changes has lower volatility and is therefore regarded as bearing lower risk on the Manulife Risk Meter. Each risk level reflects the corresponding risk profile as shown in the box on the right:

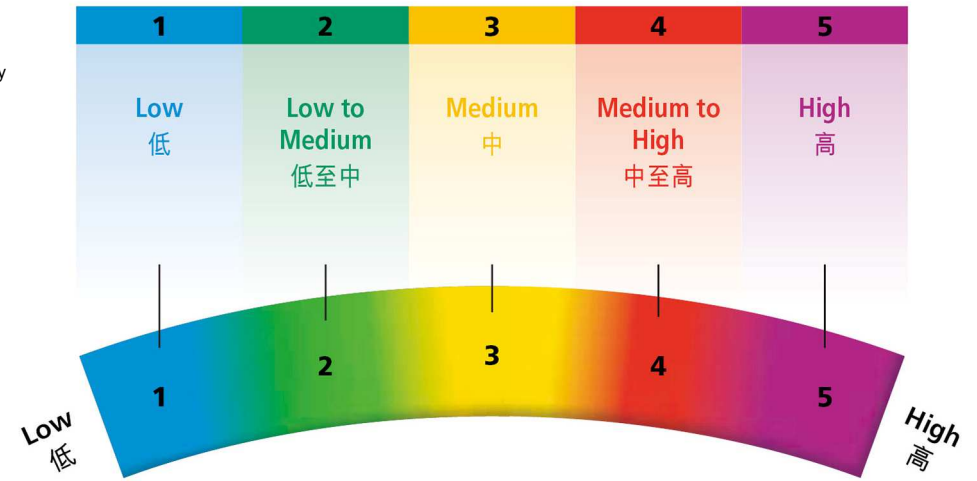

Remarks:

The 5 risk levels in the Manulife Risk Meter are determined on the basis of a number of factors relating to the underlying investments of investment choices, including the types of asset classes and their respective target weightings, the breadth and geography of diversification, the historical volatility and capitalisation of the relevant markets, investment strategy and the presence of any guaranteed investment returns. Please note that the volatility and the risk level of an investment choice may change over time and the future market volatility may not follow the historical volatility. The composition of the underlying investments of each investment choice may be different from that of the referenced market index. The Manulife Risk Meter and the risk level of each investment choice will at least be reviewed quarterly. While an investment choice of a higher risk level may be more volatile, the lowest risk level does not mean risk-free.

#有關宏利風險指標

風險水平由一個具有五個級別的宏利風險指標表示，以表示投資選項的風險程度。當宏利風險指標內所標示的風險級別愈高，就代表該投資選項對市場狀況的轉變愈敏感，波幅愈大；相反，當宏利風險指標內所標示的風險級別愈低，該投資選項對市場狀況的轉變愈不敏感，波幅愈小。每個風險級別反映對應的風險程度如右方所示：

註解：
宏利風險指標內五個風險級別的釐定，乃基於多項因素，包括投資選項旗下資產類別及其相應的目標比重、投資項目的覆蓋範圍及地域分布、有關市場過往的波幅及資本總額、投資策略和投資選項有否提供回報保證。
請注意投資選項的波幅及風險級別或會因時不同，將來波幅未必跟隨過往幅度。每隻投資選項的旗下實際投資項目成分與相關市場指數或有不同。宏利風險指標及每隻投資選項的風險級別將會最少每季檢討一次。
較高風險級別的投资選項之波幅可能較大，而最低風險級別並非代表沒有風險。

The risk level of each investment choice is assigned and regularly reviewed by Manulife (International) Limited (Incorporated in Bermuda with limited liability). The performance figures shown are on NAV to NAV basis in denominated currency and provided by Manulife (International) Limited. Other than the payout distribution investment choices denoted by their names ended with "(dist)", dividends, if any, paid by any of the underlying funds are arranged by Manulife to be reinvested in the same underlying fund. The dividend reinvestment is reflected in the unit price of the corresponding investment choice. For the payout distribution investment choices denoted by their names ended with "(dist)", the performance figures shown in the table assume that all dividend payouts, if any, are being reinvested in the investment choice level. Your actual return may therefore be lower or higher than the performance of such investment choice as shown in the table.
