

MANULIFE RETIRECHOICE (MPF) SCHEME FUND FACT SHEET

Allianz Greater China Fund

As at March 31, 2024

Risk Disclosure

All investment involves risks. You should consider all the risks associated with Allianz Greater China Fund (the "Constituent Fund"):
 • The Constituent Fund invests mainly in Greater China region equities with remaining in short term fixed-interest securities and/or cash.

You may lose your entire investments/accrued benefits in a worst scenario.

You should not invest based on this document alone and should refer to the MPF Scheme Brochure for Manulife RetireChoice (MPF) Scheme for further details, including a full description of product features, risk factors, fees and charges.

You should consider your own risk tolerance level and financial circumstances before making investment choices. When you are in doubt as to whether a certain constituent fund is suitable for you (including whether it is consistent with your investment objectives), you should seek financial and/or professional advice and choose the constituent funds most suitable for you taking into account your circumstances.

Investment Objective¹

To achieve long term capital growth by investing primarily in the equity markets of Hong Kong and Taiwan; or companies that derive a predominant portion of their revenue and/or profits from Greater China region which includes Mainland China, Hong Kong, Macau and Taiwan.

Manager's Comments

Greater China equities were relatively stable in March, consolidating the pre- and post-Chinese New Year rally. Both onshore and offshore markets have recovered from previous weakness to deliver relatively flat returns year to date. The initial catalyst for the recovery was an abrupt change in supply and demand dynamics within the market. On the supply side, the extensive selling pressure from the unwinding of "snowball" derivative plateaued in January. There has also been tightened scrutiny over IPOs, leading to a marked reduction in new issuance and curbs on short selling. The increased demand for equities was initially spurred by "national team" buying, evident through a significant pick-up in domestic ETF volumes. Also contributing to the improved demand/supply balance was a slew of coordinated share buyback announcements from state-owned enterprises as well as some high-profile companies hiking dividend payouts. The newly appointed head of the Chinese securities regulator has pushed for companies to enhance shareholder returns, in a move that echoes recent governance changes in Japan and Korea. In Taiwan, the market delivered positive returns as semiconductor companies benefited from the AI wave.

The performance is calculated on NAV-to-NAV basis, with net income reinvested, in HKD.

All figures are shown as at/or referenced using the last business day of the month unless otherwise indicated.

¹ The Constituent Fund will invest all its assets in an Approved Pooled Investment Fund ("APIF").

² Risk Indicator is shown as an annualised standard deviation based on the monthly rates of return of the Constituent Fund over the past 3 years. Generally, the greater the annualized standard deviation, the more volatile/risky the constituent fund.

³ Risk Class is (a) assigned pursuant to the methodology set out in G3.2 of the Code on Disclosure for MPF Investment Funds issued and prescribed by the Mandatory Provident Fund Schemes Authority, please refer to the last page of this fund factsheet for details of the seven-point risk classification, and (b) has not been reviewed or endorsed by the Securities and Futures Commission.

⁴ The fund expense ratio is for the year ended 30 June 2023 (latest financial year).

* Information reflected the underlying investment via investing in an APIF.

** "Top 10 Holdings" do not include "cash and others" which represent cash at call, account receivable and account payable.

Past performance information presented is not indicative of future performance.

基金經理評論

大中華區股市在3月份相對穩定，鞏固了農曆新年前後的升勢。在岸和離岸市場均從早前的弱勢中復甦，年初至今的回報相對持平。股市復甦起初的催化因素來自於市場供求動態驟變。供應方面，衍生工具「雪球」被平倉所帶來的廣泛拋售壓力在1月份趨於穩定。中國亦加強對首次公開招股之審查，導致新股發行量以及沽空活動顯著減少。股票需求的增加最初是由「國家隊」買盤帶動，這從國內交易所買賣基金的交易量顯著增加可見一斑。一系列國有企業有默契地宣佈採取股份回購行動，加上一些備受矚目的公司上調股息，均令供求狀況改善。新任命的中國證監會負責人推動企業提高股東回報，此舉呼應日本和韓國近期治理政策的變動。台灣方面，半導體公司受惠於人工智能浪潮，令市場實現正回報。

表現是按資產淨值對資產淨值作為基礎，淨收益再投資及以港元為計算單位。除非另行通知，以上所有數據均為截至/或該月最後一個工作天的數據資料。

¹ 此成份基金將投資其所有資產於一項核准匯集投資基金。

² 基金風險標記是以過往3年的成份基金每月回報率的年率標準差作為說明基準。一般來說，年度標準差數值越大，成分基金的風險/波幅也將相對較高。

³ 風險級別(a)是根據由強制性公積金計劃管理局發出及規定的《強積金投資基金披露守則》第G3.2條所闡述的方法指定，請參閱基金概覽的最後一頁有關七個風險級別的詳情，及(b)並未獲證券及期貨事務監察委員會審查或認可。

⁴ 該比率為截至2023年6月30日(上一個財政年度)之基金開支比率。

* 資料反映核准匯集投資基金內的投資項目。

[^] 十大主要投資並不包括現金及其他。現金及其他包括通知現金、應收款項及應付款項。

往績資料並不表示將來亦會有類似的業績。

Risk Class

Pursuant to the methodology set out in G3.2 of the Code on Disclosure for MPF Investment Funds issued and prescribed by the Mandatory Provident Fund Schemes Authority, a seven-point risk classification will take effect in relation to fund factsheets starting from the reporting date on or after 31 March 2020. Each constituent fund will be assigned to a risk class based on the latest fund risk indicator. The risk class classification is ranging from 1 as the lowest to 7 as the highest per shown in the following table.

Risk Class	Fund Risk Indicator	
	Equal or above	Less than
1	0.0%	0.5%
2	0.5%	2.0%
3	2.0%	5.0%
4	5.0%	10.0%
5	10.0%	15.0%
6	15.0%	25.0%
7	25.0%	

風險級別

按照強制性公積金計劃管理局發出及規定的《強積金投資基金披露守則》第G3.2條所闡述的方法指定，七個風險級別於滙報日是在2020年3月31日或之後的基金概覽中顯示。每個成分基金的風險級別乃根據該成分基金的最新基金風險標記而定。風險級別範圍由1為最低級別至7為最高級別並於以下圖表列出。

風險級別	基金風險標記	
	相等或以上	少於
1	0.0%	0.5%
2	0.5%	2.0%
3	2.0%	5.0%
4	5.0%	10.0%
5	10.0%	15.0%
6	15.0%	25.0%
7	25.0%
