JUNE 2022 / FACTSHEET

- The Fund invests primarily in an actively managed globally diversified portfolio of fixed income instruments.
- The Fund is subject to risks relating to investment, credit, interest rate, volatility and liquidity, downgrading, sovereign debt, valuation, credit rating, counterparty and currency risks, as well as risks associated with collateralised and/or securitised products. The Fund's investment may be concentrated in specific countries or regions and the value of the Fund may be more volatile.
- The Fund's investment in sub-investment grade or unrated debt securities may be subject to higher liquidity, volatility and credit risks than high-rated debt securities, as well as increased risk of loss of principal and interest.
- RMB classes are subject to RMB currency risks. RMB is currently not freely convertible and conversion of RMB is subject to foreign exchange control policies and restrictions. There is no guarantee that RMB will not be subject to depreciation. Under exceptional circumstances, payment of realisation proceeds and/or dividend payment from underlying investments to the Fund in RMB may be delayed.
- The Fund may invest in derivatives for investment or efficient portfolio management purposes which may involve counterparty/credit, liquidity, valuation, volatility and over-the-counter transaction risks. Exposure to derivatives may lead to a high risk of significant loss by the Fund.
- The Fund's investment in debt instruments with loss-absorption features ("LAP") are subject to risks of contingent write-down or contingent conversion to ordinary shares upon occurrence of complex and unpredictable trigger events which may result in higher price volatility and total loss of amount invested. LAP may also be exposed to liquidity, valuation and sector concentration risk.
- Dividends may be paid out of unrealised capital gains at the discretion of the Manager which would effectively represent paying dividend out of capital. This amounts to a return or withdrawal of part of an investor's original investment or any capital gains attributable to that original investment. Payment of dividends may result in an immediate reduction of the net asset value of the Fund per unit.
- Investors may suffer substantial loss of their investments in the Fund.

OBJECTIVE

The objective of the Fund is to achieve an attractive level of income together with potential long-term growth in the value of assets.

STRATEGY

The Fund will invest in an internationally diversified portfolio of fixed interest securities. The portfolio may also, from time to time, include securities with floating interest rates.

*Relates to Class A USD Inc share. Dividend is not guaranteed, subject to manager's discretion. A positive yield does not imply a positive return of the Fund. Annualized dividend yield is for reference only. The amount of dividend payout for the period depends upon the number of shares held by the investors as of the record date for that period's distribution and the relevant annualized dividend yield is calculated using the formula: $[(1 + \text{Distribution per unit for the period} / \text{ex-dividend NAV per unit})^2] - 1$.

Barings Global Bond Fund Class A USD Inc share was rated against the following numbers of EAA Fund Global Bond investments over the following time periods: 847 investments in the last three years, 684 investments in the last five years, and 420 investments in the last ten years. Past performance is no guarantee of future results.

Morningstar Rating is for Class A USD Inc share only; other classes may have different performance characteristics.

Barings' Global Sovereign Debt team uses a custom methodology to calculate average rating for the portfolio. Weighting is based off of market value, with unrated securities excluded from the weights. Non-USD denominated sovereign bonds are assigned a rating according to the following waterfall, leading from highest priority to lowest priority: 1) Moody's LT Currency Rating 2) S&P LT Currency Rating 3) Moody's Issue Rating 4) S&P Issue Rating. Corporate bonds and USD denominated sovereign bonds are assigned the median observation from S&P, Moody's, and Fitch ratings; if all three agencies have not reported a rating, the security will be assigned an internal rating on a PD scale. Cash is assigned a rating of AAA. Methodology for derivatives will differ depending on the type.
