

Schroders Schroder International Selection Fund Global Bond

A Accumulation USD | Data as at 30.06.2022

Important Information

The fund invests primarily in fixed and floating rate securities.

- The fund invests in debt securities which may be subject to interest rate, credit and counterparty risks and risk relating to below investment grade and unrated debt securities, etc.
 - Investment in sovereign debt obligations which may expose the fund to political, social and economic risks. The fund may suffer significant losses upon defaults by government entities.
 - The fund may invest substantially in European securities and may suffer from adverse economic or financial events in Europe.
 - The fund may invest in mortgage related and other asset backed securities that may be subject to interest rate, credit and liquidity risks.
 - The fund's active management of currency positions may result in losses if the strategy/technique is not successful.
 - The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher counterparty, liquidity and valuation risks. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
 - For share classes with a general dividend policy, expenses will be paid out of capital rather than out of gross income. The amount of distributable income therefore increases and the amount so increased may be considered to be dividend paid out of capital. Share classes with a fixed dividend policy may pay out both income and capital in distributions. Where distributions are paid out of capital, this amounts to a return or withdrawal of part of your original investment or capital gains attributable to that and may result in an immediate decrease in the net asset value of shares.
- You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Investment Objectives

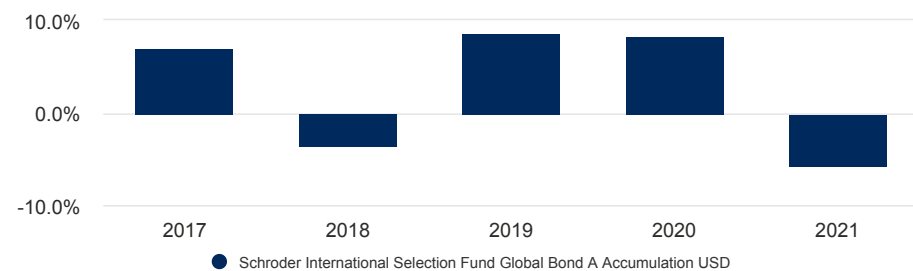

The Fund aims to provide capital growth and income in excess of the Bloomberg Barclays Global Aggregate Bond index after fees have been deducted over a three to five year period by investing in fixed and floating rate securities.
