

Allianz Choice Balanced Fund

Risk Disclosure

- The Fund aims to achieve a high level (above market) of overall return over the long term by investing in a diversified portfolio of global equities and fixed-interest securities.
- The Fund is exposed to investment risk, equity risk, risk of investing in fixed-interest securities, company-specific risk, and concentration risk, risks relating to the nature of a fund of funds, currency risk and asset allocation risk.
- The Fund may invest in financial futures or options contracts which may expose to higher counterparty, liquidity, and market risks. Use of such derivatives may become ineffective and result in significant losses to the Fund. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- Investment involves risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Investment Objective

The Fund aims to achieve a high level (above market) of overall return over the long term by investing in a diversified portfolio of global equities and fixed-interest securities.

Manager's Comments

US equities closed the month of April slightly higher, lifted by a raft of better-than-expected corporate earnings from high-profile tech companies in the last days of the month. This helped the US market overcome fears of an economic slowdown as well as expectations that the Federal Reserve (Fed) would raise interest rates at its next meeting in early May. US bonds eked out positive returns over April. Treasuries initially rallied sharply, with the 10-year yield falling below 3.3% for the first time in seven months as problems in the banking sector boosted speculation that the Fed would need to cut rates later this year. But bond yields later rose once more as these expectations seemed premature. Yields fell modestly across the curve over the month.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemption.

Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance.

Investors should read the prospectus for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited.

Allianz Global Investors Asia Pacific Limited (32/F, Two Pacific Place, 88 Queensway, Admiralty, Hong Kong) is the Hong Kong Representative and is regulated by the Securities and Futures Commission of Hong Kong. (54/F, One Island East 18 Westlands Road, Quarry Bay, Hong Kong).

基金經理評論

美國股市在4月份輕微高收，主要受到多家知名科技公司在4月份最後數天發表優於預期的企業盈利所帶動。這有助美國市場克服對經濟放緩的憂慮，以及對美國聯儲局在5月初的下月會議上加息的預期。美國債券在4月份微升。美國國庫券在月初大幅上升，10年期債券收益率七個月以來首次跌至3.3%以下，因為銀行業出現問題，刺激市場揣測聯儲局將需要在今年稍後減息。但債券收益率隨後再次回升，因為這些預測似乎為時尚早。整體收益率在月內略為下降。
