

Allianz Choice Balanced Fund

ALLIANZ GLOBAL INVESTORS CHOICE FUND

Risk Disclosure

- The Fund is exposed to investment risk, equity risk, risk of investing in fixed-interest securities, company-specific risk, and concentration risk, risks relating to the nature of a fund of funds, currency risk and asset allocation risk.
- The Fund may invest in financial futures or options contracts which may expose to higher counterparty, liquidity, and market risks. Use of such derivatives may become ineffective and result in significant losses to the Fund. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- Investment involves risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Investment Objective

The Fund aims to achieve a high level (above market) of overall return over the long term by investing in a diversified portfolio of global equities and fixed-interest securities.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemption. Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance. Investors should read the offering documents for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited.

Allianz Global Investors Asia Pacific Limited (32/F, Two Pacific Place, 88 Queensway, Admiralty, Hong Kong) is the Hong Kong Representative and is regulated by the Securities and Futures Commission of Hong Kong. (54/F, One Island East 18 Westlands Road, Quarry Bay, Hong Kong).

Manager's Comments

US stocks rallied in December, with the S&P 500 Index closing the year close to the all-time high it reached in January 2022, whilst the Nasdaq touched a fresh record peak. The rally was driven by rising hopes of a soft landing for the US economy, as well as signals from the US Fed that rates were likely at their peak and that borrowing costs would be lowered in 2024. Smaller companies outperformed larger ones significantly over the month. US bonds rallied in December, building further on November's robust advance as investors priced in the potential for rate cuts in 2024. The yield on the 10-year Treasury bond fell around 50 basis points (bps) over the month, moving back below 3.9% for the first time since July. Yields on shorter dated bonds also declined, with the two-year yield closing the month at 4.25%, a level last seen in May.

基金經理評論

美國股市在12月份上升，標準普爾500指數在年內收市逼近2022年1月的歷史高位，而納斯達克指數更創新高。市場對美國經濟軟著陸的期望升溫，加上美國聯儲局表示利率很可能已經見頂，借貸成本將於2024年下降，推動股市反彈。小型企業在月內表現大幅優於大企業。繼11月份強勁上升後，美國債券在12月份繼續上升，因為投資者消化2024年可能減息的情況。10年期美國國庫券收益率在月內下跌約50點子，自7月份以來首次跌至3.9%以下。較短期債券的收益率亦下跌，兩年期收益率在月底收於4.25%，觸及5月份創下的低位。
