

Allianz Choice Balanced Fund

Risk Disclosure

- The Fund aims to achieve a high level (above market) of overall return over the long term by investing in a diversified portfolio of global equities and fixed-interest securities.
- The Fund is exposed to investment risk, equity risk, risk of investing in fixed-interest securities, company-specific risk, and concentration risk, risks relating to the nature of a fund of funds, currency risk and asset allocation risk.
- The Fund may invest in financial futures or options contracts which may expose to higher counterparty, liquidity, and market risks. Use of such derivatives may become ineffective and result in significant losses to the Fund. The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.
- Investment involves risks that could result in loss of part or entire amount of investors' investment.
- In making investment decisions, investors should not rely solely on this material.

Investment Objective

The Fund aims to achieve a high level (above market) of overall return over the long term by investing in a diversified portfolio of global equities and fixed-interest securities.

Manager's Comments

US stock indices advanced over May, helped by news of a last-minute agreement between President Joe Biden and House of Representatives Speaker Kevin McCarthy to raise the debt ceiling. The broad-based S&P 500 Index posted modest gains to close around a nine-month high, but the tech-heavy Nasdaq Composite Index jumped to levels seen last April, helped by a surge in AI-related stocks. US bonds sold off as investors were unnerved by the growing possibility of a US default as soon as 1 June. The yields on the two- and 10-year Treasury bonds traded above 4.5% and 3.8%, respectively, for the first time in two months, while the yield on the one-month bill reached 7.0%, a level not seen for 20 years. News of a debt-ceiling agreement between President Joe Biden and House of Representatives Speaker Kevin McCarthy helped US bond yields to decline once more in the closing days of the month.

Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this material but should seek independent professional advice.

Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemption.

Investment involves risks, in particular, risks associated with investment in emerging and less developed markets. Past performance is not indicative of future performance.

Investors should read the prospectus for further details, including the risk factors, before investing. This material and website have not been reviewed by the Securities and Futures Commission of Hong Kong. Issued by Allianz Global Investors Asia Pacific Limited.

Allianz Global Investors Asia Pacific Limited (32/F, Two Pacific Place, 88 Queensway, Admiralty, Hong Kong) is the Hong Kong Representative and is regulated by the Securities and Futures Commission of Hong Kong. (54/F, One Island East 18 Westlands Road, Quarry Bay, Hong Kong).

基金經理評論

總統拜登與眾議院議長麥卡錫在最後一刻達成協議，提高債務上限，相關消息帶動美國股指在5月份上升。基礎廣泛的標準普爾500指數溫和上漲，收於約九個月高位，而受人工智能相關股票飆升的帶動，以科技業為主的納斯達克綜合指數飆升至去年4月份以來的高位。由於投資者對美國最早在6月1日違約的可能性增加感到不安，美國債券被拋售。2年期和10年期國庫券收益率分別在兩個月內首次超過4.5%和3.8%，而1個月期國庫券收益率達到7.0%，為20年來的最高水平。拜登總統與眾議院議長麥卡錫達成債務上限協議的消息，帶動美國債券收益率在月底收市時再度下跌。
