Supplemental information sheet

Share class	Share Class Base Currency	Distribution Frequency	Dividend ex-date	Dividend Amount	Annualised Yield based on ex-dividend date
AC	USD	--	--	--	--
ACHKD	HKD	--	--	--	--
AD	USD	Annually	--	--	--
ADHKD	HKD	Annually	--	--	--
PD	USD	Annually	8 July 2021	0.385675	0.25%

The above table cites the last dividend paid within the last 12 months only.

Dividend is not guaranteed and may be paid out of capital, which will result in capital erosion and reduction in net asset value. A positive distribution yield does not imply a positive return. Past distribution yields and payments do not represent future distribution yields and payments. Historical payments may be comprised of both distributed income and capital.

The calculation method of annualised yield from August 2019 is the compound yield calculation: $((1 + (\text{dividend amount} / \text{ex-dividend NAV}))^n) - 1$, n depends on the distributing frequency. Annually distribution is 1; semi-annually distribution is 2; quarterly distribution is 4; monthly distribution is 12.

The annualised dividend yield is calculated based on the dividend distribution on the relevant date with dividend reinvested, and may be higher or lower than the actual annual dividend yield.
